LAKE LYTLE
Only 95 Miles From Portland
LAKE LYTLE is not "ONE OF THE BEST" but absolutely the best beach property on the Pacific Coast.

In 1910, William K. Lytle, a wealthy Portland merchant, discovered the area that is now known as Lake Lytle. He recognized its potential for recreational development and purchased a significant portion of the land surrounding the lake. Lytle's vision was to create a sanctuary for water sports and leisure activities, free from the constraints of urban life.

Lake Lytle is located in the heart of the Tualatin Valley, approximately 95 miles southwest of Portland. The lake itself is approximately 2,000 acres in size, with a maximum depth of 60 feet. The shoreline is lined with sandy beaches, providing ideal conditions for swimming, boating, and fishing.

The surrounding area is renowned for its natural beauty, with lush forests, rolling hills, and picturesque landscapes. The lake is surrounded by a network of trails and pathways, offering opportunities for hiking, cycling, and other outdoor activities.

Lake Lytle offers a wide range of recreational opportunities, including boating, fishing, kayaking, and paddleboarding. The lake is also home to a variety of wildlife, including birds, mammals, and fish.

In addition to its natural attractions, Lake Lytle is known for its historical significance. The area has been inhabited by various Native American tribes for thousands of years, and the Tualatin Valley was a major stop on the Oregon Trail.

For more information about Lake Lytle and to explore the area, visit the Lake Lytle website or contact the local chamber of commerce. Lake Lytle is a must-visit destination for anyone seeking a peaceful and serene escape from the hustle and bustle of daily life.
